

COMPANY PROFILE

BMCOLOR COMPANY PROFILE

BMCOLOR have reached from 30 years of successful past to present, with the confidence of its customers. With its modern infrastructure and skilled human resources, BMCOLOR provides printing inks to packaging and printing industry, where also provides colorants and masterbatches to plastic, cable and artificial leather industry.

BMCOLOR focuses its investment and growth strategy on technological development, and adopts the principle of that service quality and competitive advantage can be provided with only advanced and modern systems.

BMCOLOR produces in the advanced facility located in Çerkezköy, which has been designed as a technology base, where planning, production, R & D and logistics units are deployed.

Istanbul-Kucukkoy facility that contains also the company headquarter has the management department, marketingsales, planning, and customer relationship units; technical department has the masterbatch production lines, strategic and innovative R & D units and sales warehouse; logistics department has the support unit of the Marmara region, and sales warehouse.

In addition, there are a strong logistics distribution network and regional sales warehouses, particularly in the Marmara Region, Izmir Aegean Region and Gaziantep Anatolia Region.

BMCOLOR's system structure is designed as customer-focused, and all the resources of the company are integrated for carrying out coordinated activities simultaneously, in accordance with the target of detecting and meeting the customer demands.

BMCOLOR's system detection is based on harmonious and planned operation of the whole organization within the value chain intended for providing quality service.

BMCOLOR's all logistics elements and sections including research & development, production, supply, maintenance, and delivery operate in an organizational structure sensitive to customer demands and market requirements.

Maintaining the economic success and environmental and social responsibilities conformably constitutes the basis of BMCOLOR's corporate culture.

In its activities and value creation process as well as its management system that it implements in its structure with the approach of trust in business, BMCOLOR grounds on a business and management understanding based on customer satisfaction, employee safety and environmental responsibility.

PRODUCT RANGE

Besides its wide product range, whereby it provides the printing and packaging sectors with the products suitable for all the printing techniques, BMCOLOR also manufactures customer-origin products and make them available for their service. BMCOLOR also manufactures “colorant products” and “masterbatch products” for industrial sectors.

Rotogravure and Flexographic Inks

BMCOLOR offers optimum solutions with Liquid Ink Series, designed for hi-tech rotogravure and flexographic printing machines and printing methods, employed through the packaging industry, with high performance and specifications that meet the requirements of the industry.

Liquid Ink Series within the BMCOLOR Product Range has a nature to improve the quality and the performance of the application (surface printing and lamination) thanks to specifications thereof such as drying time, heat resistance, adhesion strength, solvent retention, abrasion and scratch resistance.

Liquid Ink Series have a wide range of variety Liquid Inks according to the needs of users for printing materials on such as OPP, BOPP, CPP, PET (chemically treated), PET (physical corona), BOPA, LD-PE, HD-PE, PVC, Coated Paper, cardboard, aluminum foil (lacquered, not lacquered) and etc.

BMCOLOR, in addition to presenting the right products to users based on printing method and printing material designs the products thereof by taking into also account the physical processes to be applied on the finished packaging (shrink, retort, etc.) and storage conditions of the packaging and proposes solutions to users with these details and scope.

In addition to the wide color range of BMCOLOR’s Color Scala of its own, tailor made colors according to customers needs and worldwide approved universal color matching systems special colors are also available.

Concentrated Pastes

BMCOLOR’s Product Range has been developed to offer customers concentrated pastes suitable for rotogravure and flexographic printing machinery in order to get the best solution for their esteemed requirements.

By choosing only the technical varnish system needed for the required print BMCOLOR customers are ensured only to keep storage for common pigment concentrate for their dispensing systems that are capable of printing on materials such as OPP, BOPP, CPP, PET (chemically treated), PET (physical corona), BOPA, LD-PE, HD-PE, PVC, Coated Paper, cardboard and aluminum foil (lacquered).

Varnish and Lacquers

BMCOLOR offers all the solutions requested through the esteemed clientele thereof by virtue of its Varnish and Lacquers designed according to the requirements of fields of employment, print materials and industrial requirements.

Additives

BMCOLOR offers all the solutions requested through the esteemed clientele thereof by virtue of its Additives designed according to the requirements of fields of employment, print materials and industrial requirements.

Sheetfed Inks

BMCOLOR offers optimum solutions with Sheetfed Ink Series, designed for hi-tech offset printing machines and printing methods, with high performance and specifications that meet the requirements of the industry.

All Sheetfed Ink Series are suitable for printing front, back or flat prints and have the specification of not drying in the chamber for 48 hours much as features such as color intensity of the series, the chemical resistance, drying rate and abrasion resistance may vary. Sheetfed Ink Series have a wide variety of employment for printing materials such as I. Quality Paper, Coated Paper, cardboard and etc. according to the needs of users.

In addition to the wide color range of BMCOLOR's Color Scala of its own, tailor made colors according to customers needs and worldwide approved universal color matching systems special colors are also available.

Coldset Inks

BMCOLOR offers Coldset Ink Series developed for the newspaper industry inks with high color intensity, brightness and a very high abrasion resistance. Coldset Ink Series of BMCOLOR, thanks to excellently provided ink-water balance thereof, ensures reaching the best level of clarity. Coldset Ink Series are classified according to machine speed and thus provide its users with the opportunity to choose the best own series in accordance with the speed of their machines.

Pastes and Colorants

BMCOLOR produces Color Pastes for needs of a variety of sectors mainly including Artificial Leather and Cable Industry. Color Pigments needed through clientele in to be employed in production of Plasticizer Based Pigment Pastes are offered in the form of paste without the need for customers to contaminate the environments thereof and ready to use in the most economical way without additional costs. Conventional pigments dispersed in phthalate-free plasticized products are offered from ready stocks and alternative products to those of customers produced in their own premises are also produced and offered to customers.

Pastes and Colorants within the product range of BMCOLOR: Phthalate-free pigment pastes produced by organic, inorganic, conventional and high performance pigments that have reached maximum dispersion for PVC Artificial Leather and Cable Industry. Fluid pigment dispersions produced by solvent-based conventional and high-performance pigments which have been very good dispersed and compatible with aromatic and aliphatic polyurethanes. Color pastes produced with conventional pigments compatible with universal color matching systems for Cable to industry in parallel with the requests and demands of our customers.

Masterbatches

BMCOLOR Masterbatch Product Range is composed of Color, Black, White, Compound and Additive Masterbatches and offers advantageous solutions for film packaging, cables, pipes, sheets, furniture, white goods and automotive sectors thanks to products with high performance and specifications such as brightness, opacity and hiding power. BMCOLOR, in addition to standard products within the product range thereof, also develops special products according to the employment process of the client, in customer-specific colors as per the requests of clientele and offers foregoing to you, valued customers.
